DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6, drawn to a method for preparation of a complex comprising a PDGF nucleic acid ligand, classifiable in class 435, subclass 6.
- II. Claims 7 and 8, drawn to methods of improving pharmacokinetic properties and targeting therapeutic or diagnostic agents comprising PDGF nucleic acid ligands, classifiable in class 514, subclass 44.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different functions. The function of invention I is to make a complex comprising a PDGF nucleic acid ligand while the function of invention II is to improve pharmacokinetic properties or target therapeutic agents comprising PDGF nucleic acid ligands. Invention II is methods of targeting complexes to a patient. The inventions are of different scope because invention II requires an in vivo use not present in invention I.

Furthermore, examining invention I together with invention II would impose a serious search burden. In the instant case, prior art searches of methods of preparing

Art Unit: 1635

complexes comprising PDGF nucleic acid ligands are not coextensive with prior art searches of methods of improving pharmacokinetic properties or targeting therapeutic agents comprising PDGF nucleic acid ligands. Search of each of these inventions would require different key word searches of each compound and of each distinctive step of the method using divergent patent and non-patent literature databases. The different searches would then require subsequent in-depth analysis of the unrelated prior art literature, placing a serious burden on the Office in terms of both search and examination. As such, it would be burdensome to perform examination of inventions I and II together.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
